

Fungus species list for Wadsley and Loxley Commons

Compiled by Steve Clements and Alan Smith to Nov 2017

Identification of fungi is often very difficult, so it's unreasonable to expect that every species in the list below is 100% correctly named. Many require detailed microscopy and costly literature. However, the list indicates that over 200 kinds of fungi have been recorded so far on Wadsley and Loxley Commons.
